

Industrial Inkjet Equipment to Optimize Performance

Kao supports you with hardware and equipment proven to achieve greater efficiency and print quality.

BULK SUPPLY SYSTEM FOR HP AND FUNAI

We offer gravity-fed bulk supply systems for HP and Funai printers. The system consists of a 1-litre ink bottle or 500ml for solvent-based inks and feeds up to 8 inkjet cartridges. Bottles and cartridges each have a quick disconnect feature that makes it easy to change them.

Benefits of the Bulk Ink Supply Station

- Minimise operator interventions with fewer ink cartridge changes
- Reduce downtime for your printing operation
- Significant cost savings over single-use printer cartridges
- Feed ink to as many as 8 cartridges
- Fewer disposables create less waste, supporting your sustainability goals

ADVANTAGES FOR YOU

- More sustainable production
- Cost-effective
- Increased production
- Less downtime

UNIVERSAL CONTROLLER - ADD TO EFFICIENCY AND SUSTAINABILITY

The Kao Universal Controller replaces end-of-life controllers with the added benefit of integrating multiple printhead technologies on a single platform.

Benefits of the Kao Universal Controller

- Manages multiple industrial inkjet printheads and technologies
- Custom code extends controller life
- Optimise production for greater efficiency and sustainability
- Familiar interface, low learning curve
- Greater control over speed, resolution and more

X-BAR PRINT MODULE - EXTEND THE LIFE OF YOUR PRINTER

Designed for high-speed, high-volume, single-pass applications, the Kao X-BAR Print Module breathes new life into your ageing Kodak printing operation.

Benefits of the Kao X-BAR

- Cost-effective - replace up to 8 Kodak modules for the cost of a new printer
- Increased uptime
- Reduce ink usage by 50%
- 1,000 FPM
- Higher quality printing - 1200x600 dpi
