

VARGA FLEXO

„Planning and development partner with maximum flexibility“

In Hungary almost a unique way we are capable for full product development from idea to production. There can be found in-house the mechanical engineering, electrical and mechatronics planning and design as well as software development. We can fully cover all sections of product design and development processes and even we also have our own manufacturing plant. We recommend at your

service our gray matter in product development and manufacturing continuously engaged in the past 27 years. The success of the work of our mechanical designers, electrical engineers and software developers was awarded with several international and domestic innovations and product design prize. **If you are looking for a partner for your developments, please contact us!**
