Dig Data. Do Better

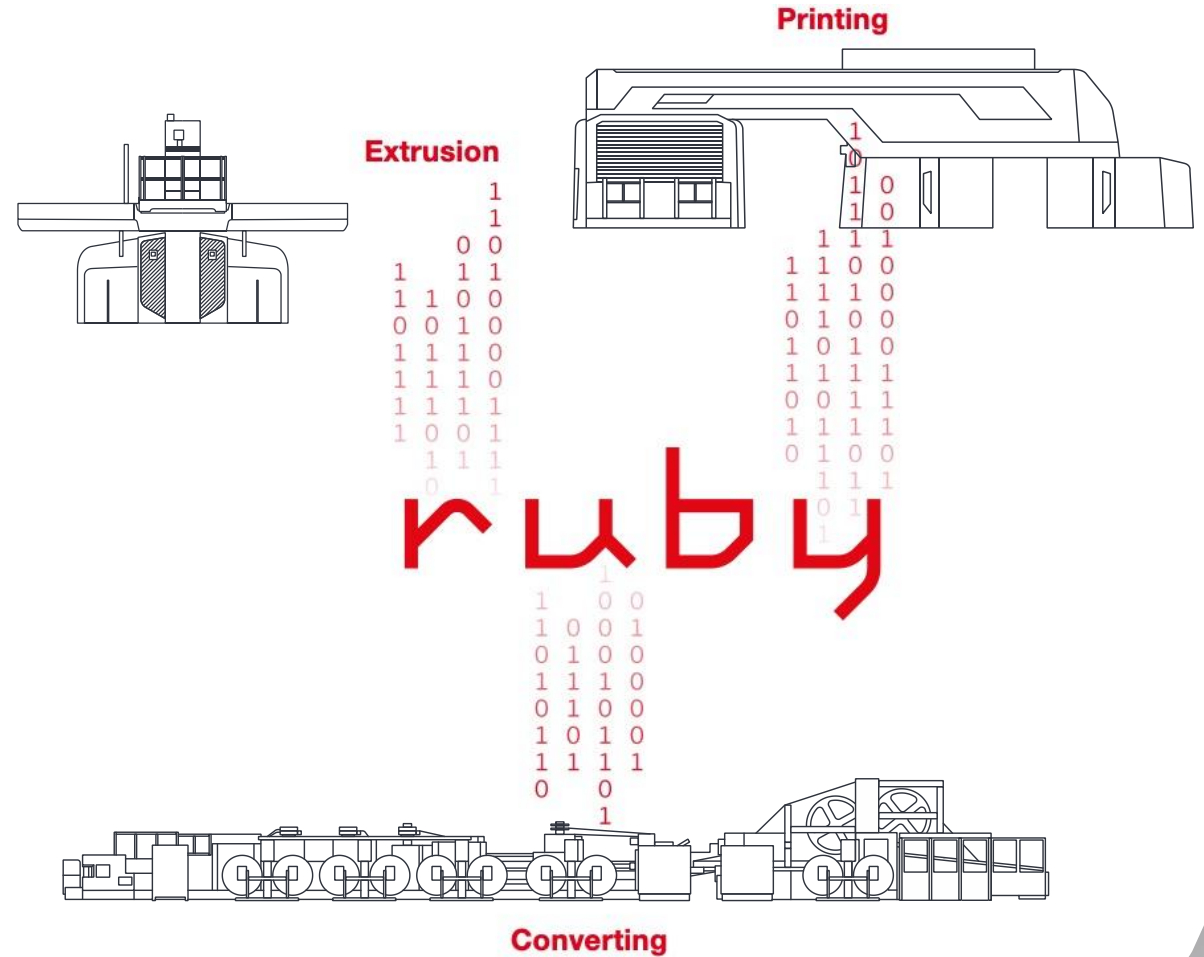

Data is the "New Treasure"

We have the process engineering know-how to successfully digitize packaging production.

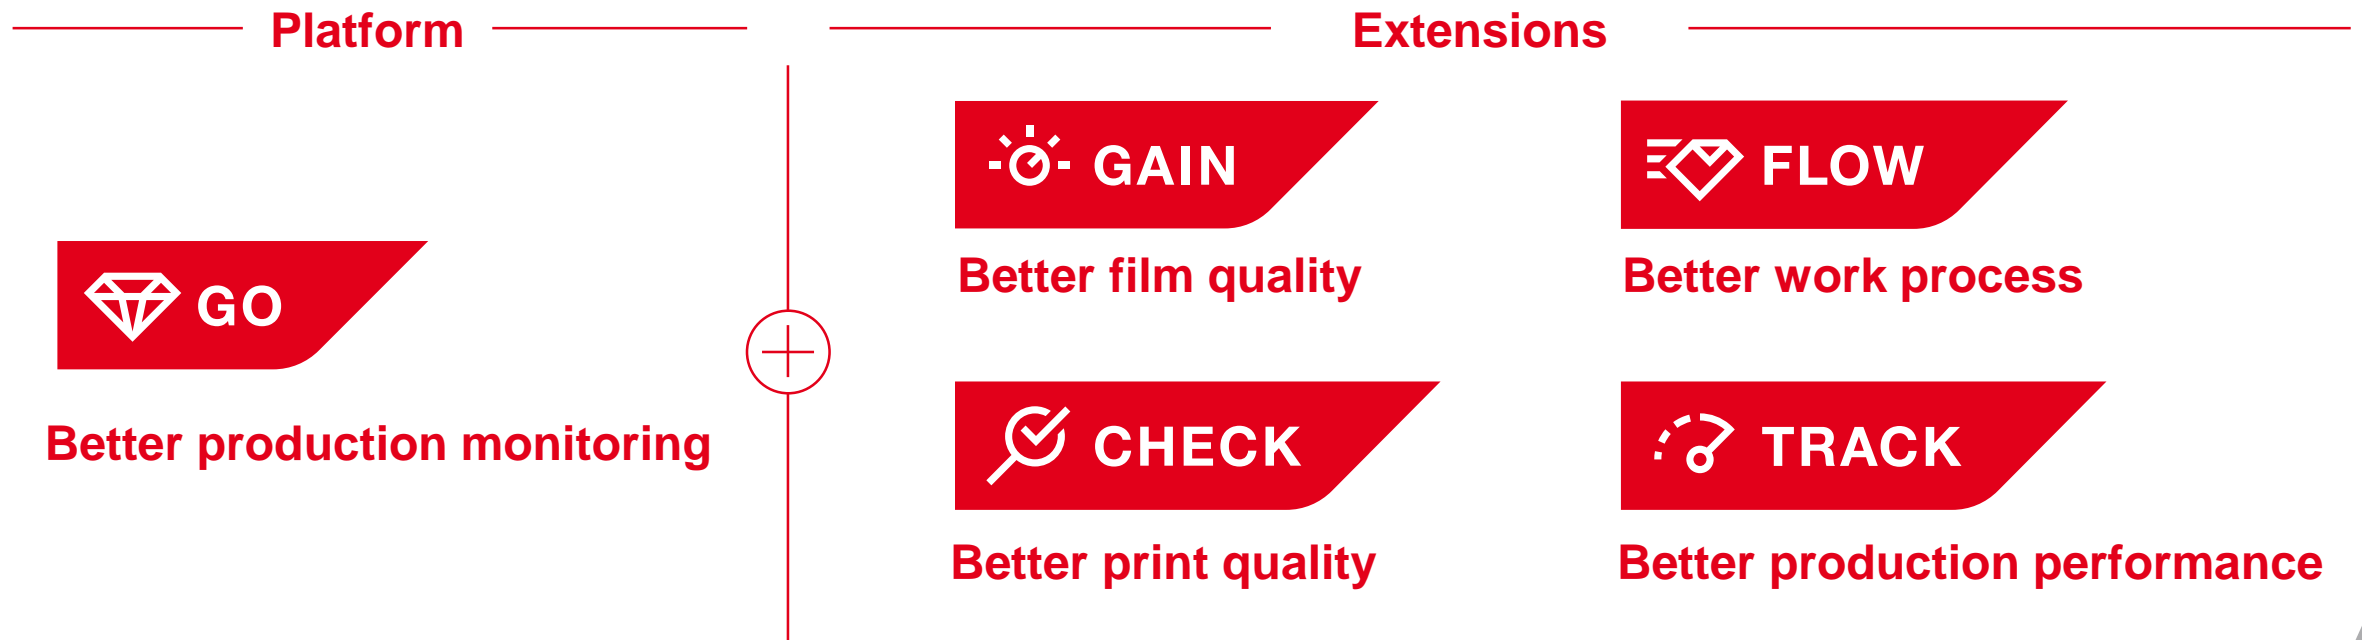

With our new **IoT system RUBY**, we provide you with a solution for the entire value chain to use your data in a simple and user-friendly way to improve processes and products.

RUBY enables you to uncover the hidden treasure in your packaging production: Data!

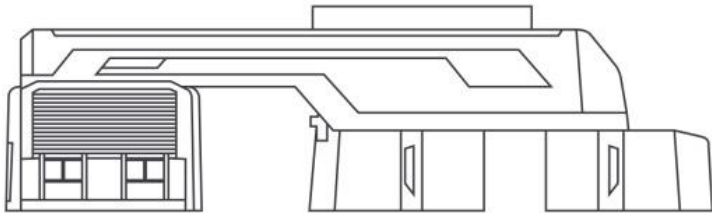

The W&H IoT Platform

One Platform : Four Extensions

Your Entry to the world of Smart Production

Your W&H machine provides current machine and quality data.

The W&H IoT system recommends improvements based on data analysis.

RUBY is

More Effective

Higher productivity and better quality by intelligent improvement of parameters.

More Efficient

Less waste and downtimes by data-based error detection and alarms.

More Transparent

Production data is tracked along the value chain.
It can be used to optimize your condition monitoring or claim management.

Ruby is made for your requirements

Open

- ✓ Data export function
- ✓ Connectivity to MES/ERP systems
- ✓ Data migration from ISP
- ✓ Suitable for all machinery along the value chain

Secure

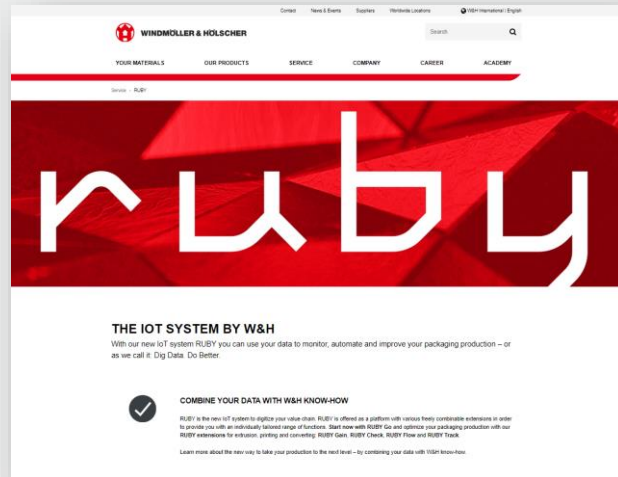

- ✓ Located in your own network
- ✓ Control over data storage and access
- ✓ State-of-the-art firewall and gateway

Easy

- ✓ Plug & play software installation
- ✓ Regular feature and security updates
- ✓ Standard interface OPC UA
