

# VISTAFLEX

The wide-web fully automated robotic press

## Why VISTAFLEX?

- **The high performance press**

The unique VISTAFLEX is the central impression press for wide and ultra wide webs, long print repeats, highest print speeds and greatest overall productivity.

- **The fully automated press**

Two independent VISTAPORT robots offer completely automatic changeovers at the push of a button. Preparation of all print sleeves and anilox rollers for the next 4 jobs is organized in the VISTAPORT storage system.

Changeovers at unused decks can be done while the press is running to minimize the changeover time.

- **The ultra wide web press**

The revolutionary mandrel and sleeve handling concept is designed for wide webs up to 2200 mm and repeats of up to 1250 mm. Instead of changing sleeves and adapters the VISTAFLEX exchanges the complete printing shafts with mounted sleeves automatically. The preparation of the new shafts is done on floor level in the VISTAPORT area for most ergonomic operation even at widest formats.

## Your advantages

- ✓ Extremely high production output
- ✓ Automated job changeovers powered by VISTAPORT
- ✓ Make-ready logistics for optimized job queue
- ✓ The ideal system for large formats and wide web printing

## Technical Data

	VISTAFLEX CL	VISTAFLEX CX
Printing decks	8/10	8
Printing width	1650 mm (65")	2000 – 2200 mm (78.75" – 86.5")
Repeat	max. 1250 mm (49.2")	max. 1250 mm (49.2")
Press speed	600/800 m/min. (1960/2620 ft/min.)	600/800 m/min. (1960/2620 ft/min.)
