INNOVATION AND
EFFICIENCY IN
CONNECTION WITH
SUSTAINABILITY

INNOVATIONS

We develop innovative solutions and useful methods to optimize adhesive application processes. In this way, we bring technological advantage to our customers and strengthen their competitiveness.

Full Integration

Thanks to open interfaces, our products can be integrated easily into industrial processes. Various information transfer options simplify the connection to higher-level systems.

Smart Control

Our smart control makes adhesive application smarter. Its comprehensive control and tracking functions safeguard production sequences and optimize processes. It is the interface for efficient networking in the digital environment.

Swiss Quality

Our solutions have been developed and produced in Switzerland in line with the Swiss quality standards for over 40 years. This guarantees high quality and reliability, precision and a long service life.

Maximum Safety

We attach great importance to user and operational safety. Our products are safe, reliable and guarantee high system availability.

Simplicity

We make it easy for our customers. Our systems are straightforward, consistent, and comprehensible. They are easy to install and easy to operate thanks to intuitive user guidance (HMI).

A close-up photograph of two hands cupping a small green seedling with two leaves growing out of a mound of dark soil. The background is a soft, out-of-focus green, suggesting an outdoor setting. The overall tone is warm and nurturing.

SUSTAINABILITY

We consistently strive for careful resource usage: from development and production to adhesive application to the durability of our products and systems.

Resources

Less is more: Our energy-efficient solutions process the adhesive gently and are economical. They reduce waste to a minimum. This benefits customers and the environment.

Service Life

High product quality, the easy interchangeability of modules and the continued availability of spare parts ensure that our products have a very long service life.

Ecology

With Green Gluing we bring ecological thinking and action into the entire life cycle of our products and solutions. For example, we produce with solar energy and use an energy-efficient infrastructure.

EFFICIENCY

Thanks to their reliability, our products increase production efficiency, reduce operating costs due to their long service life, and thus enable an above-average return on investment.

High Availability

The high quality and reliability of our systems guarantee high availability. Optimal maintenance reduces the risk of unscheduled downtime.

Error-free Results

Our systems are reliable and set the standard for highest precision even at maximum production speeds.

Cost-efficient and Economical

Optimized consumption of adhesive and energy, modularity, long service life, and compatibility of the spare parts have a positive effect on the total cost of operation.

Fast Return on Investment

Lower operating costs lead to a quick amortization of the investment costs.

SERVICES

We are where our customers are – worldwide. This ensures a fast, individual service and conforms to our philosophy of long-term partnerships.

Global Presence

With offices and representatives in more than 70 countries, we are close to our customers worldwide and know their needs first-hand.

Local Support

We offer our customers “all-round service” and speak their language. Customer proximity and a common understanding simplify the cooperation: From planning and commissioning to maintenance and plant optimization.

Available Spare Parts

Spare parts are available around the world in local warehouses and in our service vehicles. This guarantees minimum downtimes.

Training

Our training courses are individually tailored to customer requirements. Due to the high standardization of our products, once acquired knowledge can be transferred to other products.

Competent Consulting

We have been an expert in all aspects of the adhesive application for more than 40 years. Together with our customers, we develop custom, needs-based solutions.

We assume responsibility. With Green Gluing we build a bridge between the industrial adhesive application process and fundamental ecological values. We combine innovation and efficiency with sustainable solutions to make adhesive application more environmentally friendly, safe, and straightforward. It is essential and useful to integrate economic and ecological thinking and action into our performance. Robatech is proud to set a good example.

Martin Meier, CEO Robatech Group
