

AUTOMATIC CARDS MATCHING MACHINE

Automatic cards matching machine is mainly used for all kinds of card paper, card paper cutting, composite. It not only high efficiency, and the precision of the cutting is also high, For different specifications of the card,poker for cutting, and ensure the printing order, same before, According to the order of the design of composite, it is an ideal equipment professional production of cards and poker. The machine process automation , automatic feeding, automatic cutting, automatic folding cards, automatic cutting corner.

Technical Data

MODEL↕	PF-760↕	PF-1040↕
Max. paper size↕	760*600 mm↕	1040*720 mm↕
Min. paper size↕	450*550 mm↕	720*560 mm↕
Max. card size without drilling ↕	110*110mm↕	160*160mm↕
Min. card size without drilling↕	55*65 mm↕	55*65 mm↕
Max. card size Including drilling ↕	110*110mm↕	140*140mm↕
Min. card size Including drilling ↕	80*80 mm↕	80*80 mm↕
Paper thickness↕	250-800 g/m ²	250-800 g/m ²
Best machine speed↕	3000 decks/h↕	5000 decks/h↕
Machine power↕	7kw↕	8.9kw↕
Packing size↕	3250*4350*1400mm↕	5020*5230*1950mm↕
Weight↕	3500kg↕	4000kg↕
