

MCM-200 Punching King

MCM-200 "punching king" is based on the production of all kinds of labels cutting machine for many years, the machine is controlled by PLC system. with simple operation, all components can be achieved 0.1mm. "Punchingking" is mainly used for the die cutting process of any labels. The machine is characterized by high manufacturing accuracy, compact structure and reasonable operation. After using by professional beer and label manufacturers, it was proved that the machine has the advantages of high working efficiency and precise die cutting precision.

Technical Data:

The maximum cutting size: 150 mm×150 mm

The minimum cutting size: 30 mm×50 mm

Cutting stroke: 250 mm

Motor power: 5.6kw

Air pump: 0.5MPa~0.8MPa

Net weight: 1000kg

Packing size: 1600mm×950mm×1200mm

How to purchase dies:
