

1. 覆膜机 SW-820 1分11秒 120字

SW-820 automatic laminator is newly developed for the lamination of pre-glued film and paper. It is fast and efficient machine, max speed can be reached 65m/min. The machine realizes complete automation to paper feeding system, separating system, man-machine interface system, paper collecting and electromagnetic heater. Schneider, Omron etc international brands of electrical and photovoltaic parts equipped perfect the running stability and safety of the laminator. Instant Electromagnetic Heater heat up time shorten to 90 seconds, accurate temperature control: $\pm 1^{\circ}\text{C}$.

2. 糊盒机 800D 1分24秒 116字

ZH-800D Folder gluer can make the crash lock bottom boxes, pre-fold boxes and straight line boxes. It has ten features :

auto feeding, Lower gluing, Double-side grinding, Double-side gluing, Four-side folding, Crash lock bottom, Upper gluing, Folding, Wireless remote controller, Auto counting.

ZH800D have the same structure with ZH800G. Based on G-series, D-series has the following improvements:

1. ZH-D series adds the upper belt on the folding unit to improve the stability in box movement.
2. Adds the pre-press section before the press section to improve the stability and smoothness in box movement.
3. Pressing unit has separate motor to control speed. It has auto trombone control function (only when the box comes, the pressing unit works)

3. 烫金机 TL-780 1分38秒 144个字

The TL-780RD vertical automatic stamping die-cutting machine consists of main motor, hot stamping, auto feeder and electric equip. The machine is designed for the hot stamping, embossing, die cutting, hot cutting, creasing etc technology. It's suitable for paper and all kinds of plastic film. In order to complete the operation of larger area, using airflow stripping bodies to ensure that printing products and foil separation.

1. The machine is converted into a machine that it can wail foil left-right and up-down.
2. The feeding adopts cylinder to separate and merge.
3. Adjust the pressure adopts servo motor driven, it can be adjusted on the touch screen, and fine-tune, it also can adjust without stopping the machine.
4. Lubrication adopts oil pump, the oil can be recycled filter and use.
5. The main motor adopts alternating current inverter control, starting and braking adopts pneumatic clutch device, so that the machine can be operated in any case freely, and more secure.

4.A4 分切机 1 分 43 秒 156 个字

High Speed Servo Synchro A4/A3 Paper Sheeting Machine is mainly used to cut the paper reel into sheets. It adopts the most advanced technology, including the AC servo driving system. The driving system ensures the machine working with high speed, continuously, and stably. It is widely used in the paper mills, paper converters, as well as the printing house etc.

Main Characteristics

1. The machine used the twin rotary shearing method, not the traditional cutting method.
2. High cutting accuracy, the squareness will meet the printing requirement with one cutting process, no need for second cutting.
3. After sheeting by the machine, the finished sheet can be used on printing machine directly.
4. Cleaning cutting edge, no burr or dust generated
5. The original SIMENS PLC, motion controller and Italy PHASE servo motor, OMRON electrical components are adopted.
6. The machine also can be connected to the wrapping unit, it is a completed production line for the A4 or A3 paper .

5. 全自动模切机 1050s 1 分 23 秒 123 字

The 1050 Automatic Die Cutting Machine is key equipment for printing finishing such as die cut, crease and embossing etc. Unique drive gears are adopted such as high-precision indexing mechanism, pneumatic closed up, pneumatic clutch, overload protection, automatic compression relief etc, to ensure stable and high speed running of the machine. This machine is equipped with practical and reliable mechanism such as pre-stack device, secondary delivery mechanisms, manual sampling, etc, which ensure the excellent performance of the machine. Electrical components and driving elements of internationally known brands to ensure die cutting precision and reliability of running. Also man-machine interface is able to monitor machine running status, troubleshooting and indicating relevant help information which fully actualized man-machine communication. Also stripping can be optional .

6.800GS 糊盒机 1 分 30 秒 98 字

800GS folder gluer with 4&6 corner adopts foreign advanced technology and independent transmission structure. It is a dual-purpose equipment. The whole machine including electric adjustment board, PLC control, imported electronic components, ensures the stable performance and easy operation. This machine is specially designed for all kinds of cardboard and corrugated packaging boxes. It adopts the correction function. This machine is equipped with a folding function for all kinds of four corner and six corner packaging boxes, which perfectly meets the needs of the automated packaging industry. (If there are special requirements, we can customize according to customer needs.)

7.半自动裱纸机 YB-1300 1 分 34 秒 104 个字

The 1300 semi-automatic flute laminating machine's bottom sheet automatic sent by suction device, and top sheet feeding manually. This humanized design makes paper feeding easier and more efficient. It is suitable for color top sheet and corrugated paper laminating, color top sheet and grey cardboard laminating.

It has front gauge registration, position high accuracy, bottom sheet never exceeds the top sheet. Machine uses touch-screen / PLC control system, the circuit system is stable, and can automatically display the failure alarm.

It is suitable for color top sheet 175-500g and A/B/C/D/E/F corrugated paper laminating; Color top sheet 175-500g and grey cardboard paper laminating.

8. 公司介绍: 2 分 40 秒 (200 字)

Why choose us?

Because we have

1. Good Brand.
2. Good quality products.
3. Good after sales service
4. Fast reply

Shanghai Printyoung International Industry Co., Ltd. is a professional printing and packaging equipment manufacturer and supplier. Our company is located in Shanghai, China.

And we have factories in Zhejiang province. Our people have about 20 years experiences in printing field. We give the one stop solution for printing and post printing equipment. "Profession, Honest, Responsibility, Solutions" are the essence of our business. We guarantee our clients with good quality and the best service. We have joined more than 100 professional exhibitions. Our company has passed the Factory Audit by Intertek, BV & SGS.

We focus on the quality of our products. Our factory control the quality from the parts making and assembling. All the machineries we supply have good accuracy and working properly, which also satisfied by the customers. (加句子) All our products have got the CE certificate.

Our main products are Die cutting machine, Hot stamping machine, Paper cutting and sheeting machine, Folder gluer, film laminator and flute laminator. We exported to more than 60 countries. Printyoung is young and full of energy. We are looking forward to be your partner in China.
